

95U

Electrical Steel Mixer (BELT-STYLE)

95U Electrical Steel Mixer (Belt-Style) is the latest product in electrical steel mixer, specially designed for use in the construction industry. The rotary method of the motor is implemented to obtain larger speed reduction of the gear box in order to provide greater torsion. This belt-style rotary method protects the gear box and extends the life span of the motor.

The overall design overcomes oil spillage after usage over a long period of time and avoids motor damage. The mixer drum and machine mount are separable for convenience in handling. It is extremely handy to the user especially when they need to move from one location to the other. It saves cost & time to the user in terms of working duration.

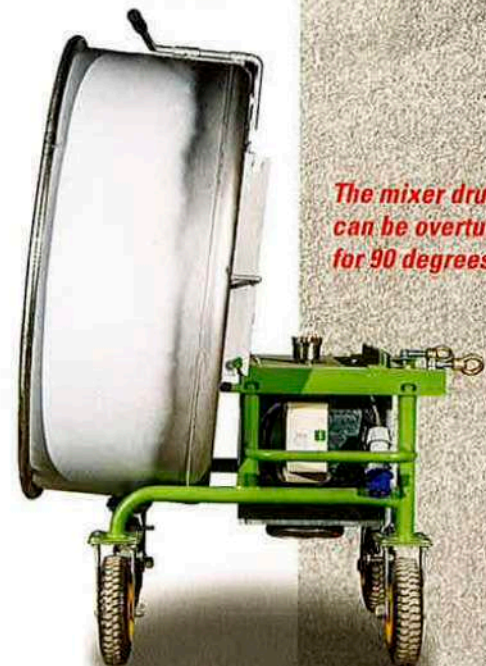

ADVANTAGES

- Belt-style rotary method protects the gear box and extends the life span.
- The overall design overcomes oil spillage after usage over a long period of time and avoids motor damage.
- The mixer drum and machine mount are separable for convenience in handling.
- Economical, times and costs saving.

TECHNICAL FEATURES

Motor Power	2 hp	Drum Size	Depth 35cm (1' 2") Diameter 90cm (3')
Voltage	220 V 50 Hz (1-phase electric)	Overall Size	Width 95cm (3' 1") Height 100cm (3' 3")
Drum capacity	200 liter	Weight	100 kg
Rotational Speed	32 r.p.m		

The mixer drum can be overturn for 90 degrees
